

# Future Planning

For successful future planning and to improve patient care please ensure the following items are completed.

If you don't have a clue, just select blue!

## Prognosis code

(on the prognosis and GSF Meeting tab)

-  >1yr, frail or chronic
-  months
-  weeks
-  days

**Remember:** In general practice - if "prognosis" isn't added, then patients may not appear on your End of Life or other registers.

## Enhanced Consent to share additional information to the Summary Care Record (on the first TAB of the template).

This is **very important**, without this information recorded the template will not be shared with the necessary teams.

+ Out of Hours + A&E

Patients can give verbal consent or provide written consent by using the 'My Wishes' leaflet.

The Template is a tool to help communicate. It is not a form to be completed. Please update the Future Planning Template in GSF meetings and following significant conversation with the patient (uDNACPR, Treatment Escalation Plans, changes in prognosis, etc).
